

Prayer Care Package Dashboard — Staff & Volunteer Manual

Oct 1, 2026 · prepared by @Eric Garrison

Welcome

The Prayer Care Package Dashboard is where every request submitted through the public intake form — for a comfort package, for prayer, or both — gets tracked from the moment a family asks for help until their case is closed.

Two kinds of people use it, and each sees a different slice of it:

- **Staff** (HQAdmin, ChapterAdmin, ChapterStaff, Director) manage every case, person, and setting.
- **Volunteers** see only their own work: cases assigned to them to pack and ship, and/or families they've joined to pray for.

This manual uses the exact page names, button labels, and URLs you'll see on screen, so you can follow along step by step.

Roles & Access

What you can see is set by your staff role, or by which volunteer role(s) are on your volunteer record — a volunteer can hold more than one role at once.

Staff role	Access
HQAdmin	Everything, every chapter. The only role that can use Login As or reach System Admin.
ChapterAdmin	Full case, volunteer, and donation access, can generate temp passwords, but not System Admin or Login As.
ChapterStaff	Same day-to-day case work as ChapterAdmin, without account-management screens.
Director	Same operational access as ChapterAdmin; never HQAdmin-only screens.

Staff role	Access
Board	Read-only across the same staff screens — can look, never change anything.
Volunteer	Only My Work Queue and the Prayer Dashboard , and only their own cases/families — nothing chapter-wide.

A volunteer record can carry one or more of these roles:

Volunteer role	What it's for
Package Assembler	Packs and ships comfort packages — shows up in My Work Queue .
Prayer Ambassador	Joins families' prayer teams — shows up in the Prayer Dashboard .
Parish Liaison, Event Helper, Driver, Admin	Other ministry roles — not used by this dashboard.

Logging In

Sign in with your email or username and password on the login page.

- **First time, or locked out?** An admin (HQAdmin, ChapterAdmin, or Director) can generate you a one-time temp password from **User Management** (see Admin Tools, below). The moment you log in with it, you're sent straight to **Change Password** — you can't use the rest of the dashboard until you set a password only you know.
- **Forgot your password?** Use "Forgot password" on the login screen, or ask an admin for a temp password.
- Where you land depends on how you got in. Logging in directly: staff go to the **Dashboard**, any Volunteer goes to **My Work Queue**. If an admin signed you in with Login As, or you're a Volunteer who opened a staff page you can't use: you're sent to **My Work Queue** if you're a Package Assembler (or hold both roles), or to the **Prayer Dashboard** if you're a Prayer Ambassador only, or have no volunteer record yet. *(Tested 2026-10-01: these two paths don't currently agree for a brand-new volunteer account — worth a look if it matters which one a new volunteer lands on first.)*

How to log in, step by step:

1. Go to the login page.
2. Type your username (or email) and password.
3. Click **Sign In**.
4. If you were given a temp password, you'll be sent straight to **Change Password** — set your own password there before doing anything else.
5. You'll land on My Work Queue (Volunteer) or the staff Dashboard (everyone else) — see the note above for the one exception.

The Public Request Form

To request a Prayer Care Package be mailed to you or a family who needs support, please complete the form below.

WHO IS THIS FOR? *

This is for me

This is for someone else

Street Address *

Apt or Suite #

City *

State *

Zip Code *

Would you like us to mention this package is from you, or remain anonymous?

- Please select -

Reason for Prayer Request *

- Please select -

How did you hear about us? *

- Please select -

Include a custom message to your recipient

Please share with us, as much as you're comfortable, your recipient's story:

Children for Bracelet: We would like to include a personalized bracelet in your recipient's Prayer Care Package. Please share the initials of all your recipient's children in birth order, including those in heaven. If your recipient's child was not named or if they are experiencing infertility, we will place special Heart beads on their bracelet.

Every case on the dashboard starts here: a family or someone referring them fills out the public form (</request-prayer-care-package>), and it becomes a case automatically — no staff step needed to create it.

The key question, **"What would help most right now?"**, offers three choices in this order:

1. **A comfort package mailed to you/the family, plus ongoing prayer** — the default; the case gets a package and sits in the Prayer Ambassadors' queue.
2. **Prayer only — no package needed** — no package to pack or ship; never auto-assigned to a Package Assembler.
3. **A comfort package only — no prayer team needed** — gets a package, but the requester explicitly opted out of the prayer team, so this case never appears in the Prayer Dashboard's queue.

Other things worth knowing:

- **Reason for Prayer Request:** Infertility, Prenatal Diagnosis, Miscarriage (before 20 weeks), Stillbirth (20 weeks or later), Infant Loss (after birth, up to age 1), or Postnatal Medical Concern.
- **Children for Bracelet:** only shown when a package was requested (either of the two package options above) — lists children in birth order for a personalized bracelet, with a Heart bead option for an unnamed child or for infertility.
- Whether the mention/anonymity and "reason" wording says "package" or "prayer request" automatically follows which option the requester picked.

Working a Case

Every case has a **Status**, shown everywhere on the dashboard, and only certain next steps are ever offered — you can't jump straight from New to Shipped.

Status	Meaning
New	Just submitted, nobody assigned yet.
InProgress	Assigned to a volunteer and being worked.
AwaitingShipment	Packed, ready to ship.
Shipped	On its way — needs a tracking number.
Fulfilled	Delivered; the case is closed.
OnHold	Paused for any reason; can resume from here.
Cancelled	No longer happening.

A **Prayer only** request skips every package status it doesn't need — nothing to pack or ship, so it's never auto-assigned to a Package Assembler; it only ever waits on the Prayer Team (next section).

How to assign an unassigned case:

1. Open the **Unassigned Queue** (`/admin/queue`) and click **Assign** next to the case.
2. Pick a volunteer from the dropdown, or click one of the ranked suggestions — pick your own name to take it yourself.
3. Click **Confirm Assignment**.

How to change a case's status: open its **Status** dropdown (on its own page, or in a Quick Update/Assign drawer), pick one of the next steps offered, fill in Tracking Number/Shipped Date if asked, and save.

Full detail on both, plus the rest of the case detail page, lives in the [Staff Guide: Managing Cases](#).

Getting assigned: new package requests are auto-assigned to a Package Assembler in the same chapter (when auto-assign is on), respecting that volunteer's maximum active cases (a chapter setting, 6 by default) and an acceptance window — 24 hours normally, 4 hours for an Urgent-priority case — before it's offered to someone else. Staff can always assign or reassign by hand from the **Unassigned Queue** (`/admin/queue`) or from a case's own page.

Possible duplicate families: if a new request looks like it might be the same family as an existing case, it's held out of the Unassigned Queue and auto-assignment, and shows instead on **Families → Duplicate Review** (`/admin/families/duplicate-review`) until staff confirm it's a new family or merge it.

The Package Pipeline board (`/admin/kanban` , staff only) shows package cases as drag-and-drop cards across columns — Unassigned, Assigned, Confirmed ("Volunteer Accepted"), Packing, Notes, Shipping — for a quick visual of where everything stands.

The Prayer Dashboard

Open **Prayer Dashboard** (`/admin/prayer-list`) — for any volunteer whose record carries the Prayer Ambassador role.

- No volunteer record yet? Click "**Create my volunteer record as a Prayer Ambassador**" — one click sets it up.

- **Families You Could Join** lists every open case that wasn't marked "package only" at intake. Pick any family and add yourself — there's no accept/decline step, you just join.
- **Praying For** lists the families you're already on. Click "**I'll stop praying for this family**" to leave anytime.
- Many volunteers can pray for one family, and one volunteer can be on many families' teams at once — no limit either way.

A request marked **Package only** at intake is the one case type that never appears here — the requester specifically asked not to involve the prayer team.

Assembling & Shipping a Package

Short, standalone guide for Package Assemblers: [Volunteer Quick Guide: Packing & Shipping a Package](#) — covers My Work Queue, moving a case through its statuses, and tracking numbers.

Admin Tools

Short, standalone guide for HQAdmin/ChapterAdmin/Director: [Admin Quick Guide: Users, Temp Passwords & Login As](#) — covers User Management, generating a one-time temp password, and signing in as another user.

Troubleshooting & FAQ

- **The bracelet question isn't showing up.** The requester picked Prayer only — it only appears when a package was requested.
- **A case isn't showing in the Prayer Dashboard's queue.** It was submitted as "Package only" — that's by design; the requester opted out of the prayer team.
- **I can't move a case to a status I expect.** Only the next valid step is ever offered — see the Status table under Working a Case.
- **A volunteer can't take a new case.** They may be at their chapter's Max Active Cases Per Volunteer cap (6 by default).
- **I forgot my password.** Use "Forgot password" on the login screen, or ask an HQAdmin/ChapterAdmin/Director for a temp password.
- **I need to see exactly what a staff member or volunteer sees.** An HQAdmin can use Login As — see the Admin Quick Guide.
