

Volunteer Quick Guide: Packing & Shipping a Package

Open **My Work Queue** at `/admin/my-queue` — for any volunteer whose record carries the Package Assembler role (staff see it too, for cases assigned to them).

Cases assigned to you — Manual Volunteer

 Refresh

You aren't set up as a volunteer yet. Cases can only be assigned to people with a volunteer record, so nothing can appear here until you have one.

Overdue

No cases assigned to you.

Steps:

1. No volunteer record yet? Click **"Create my volunteer record"** first — cases can only be assigned to someone who has one.

2. Your queue lists every case assigned to you, with KPIs for open cases, overdue cases (open more than 7 days), lifetime fulfilled count, and average age.
3. Click **"Quick Update"** on any case to move it forward. Only the valid next statuses are offered — New → InProgress → AwaitingShipment → Shipped → Fulfilled.
4. Moving to **AwaitingShipment, Shipped, or Fulfilled** also asks for a **Tracking Number** and a **Shipped Date** — fill those in before saving.
5. Click **"Details"** instead of Quick Update to see the full case — packing checklist, family info, custom message, internal notes.

Good to know:

- Each chapter sets a cap on how many active cases one volunteer can carry at once (6 by default) — if you can't take a new case, you may be at that cap.
- Staff also see **All Cases, Package Pipeline** (a drag-and-drop board), and **Unassigned Queue** above the table — a plain volunteer doesn't, since those are chapter-wide views.

If something looks wrong: can't move a case to the status you expect? Only the next valid step is ever offered — check the Status table in the main dashboard reference manual.
